The recent events at Virginia Tech have heightened anxiety and vulnerability throughout University communities across the country. What can faculty members do if they are concerned about a student? What is the difference between a student who may have emotional difficulties and one that has the potential to be dangerous to him/herself or others? What role should faculty play in the emotional lives of students?

The Counselors from the Counseling Center and Alcohol and Other Drug program will present a panel discussion on how to interpret, handle and/or react when there is concern about a student.

Health Tip of the Month

Tanorexia:

Could you be addicted to tanning?

Did you know tanning increases the release of endorphins from the brain??

- Endorphins are natural pain relievers.
- Studies suggest that frequent tanners can become addicted to tanning.

FAKE BAKING in tanning salons or sunbathing on the beach, it is all the same!

There is NO safe tan!

- c. It was suggested that we come up with an attractive logo that would be associated with the committee.
